

How to get started

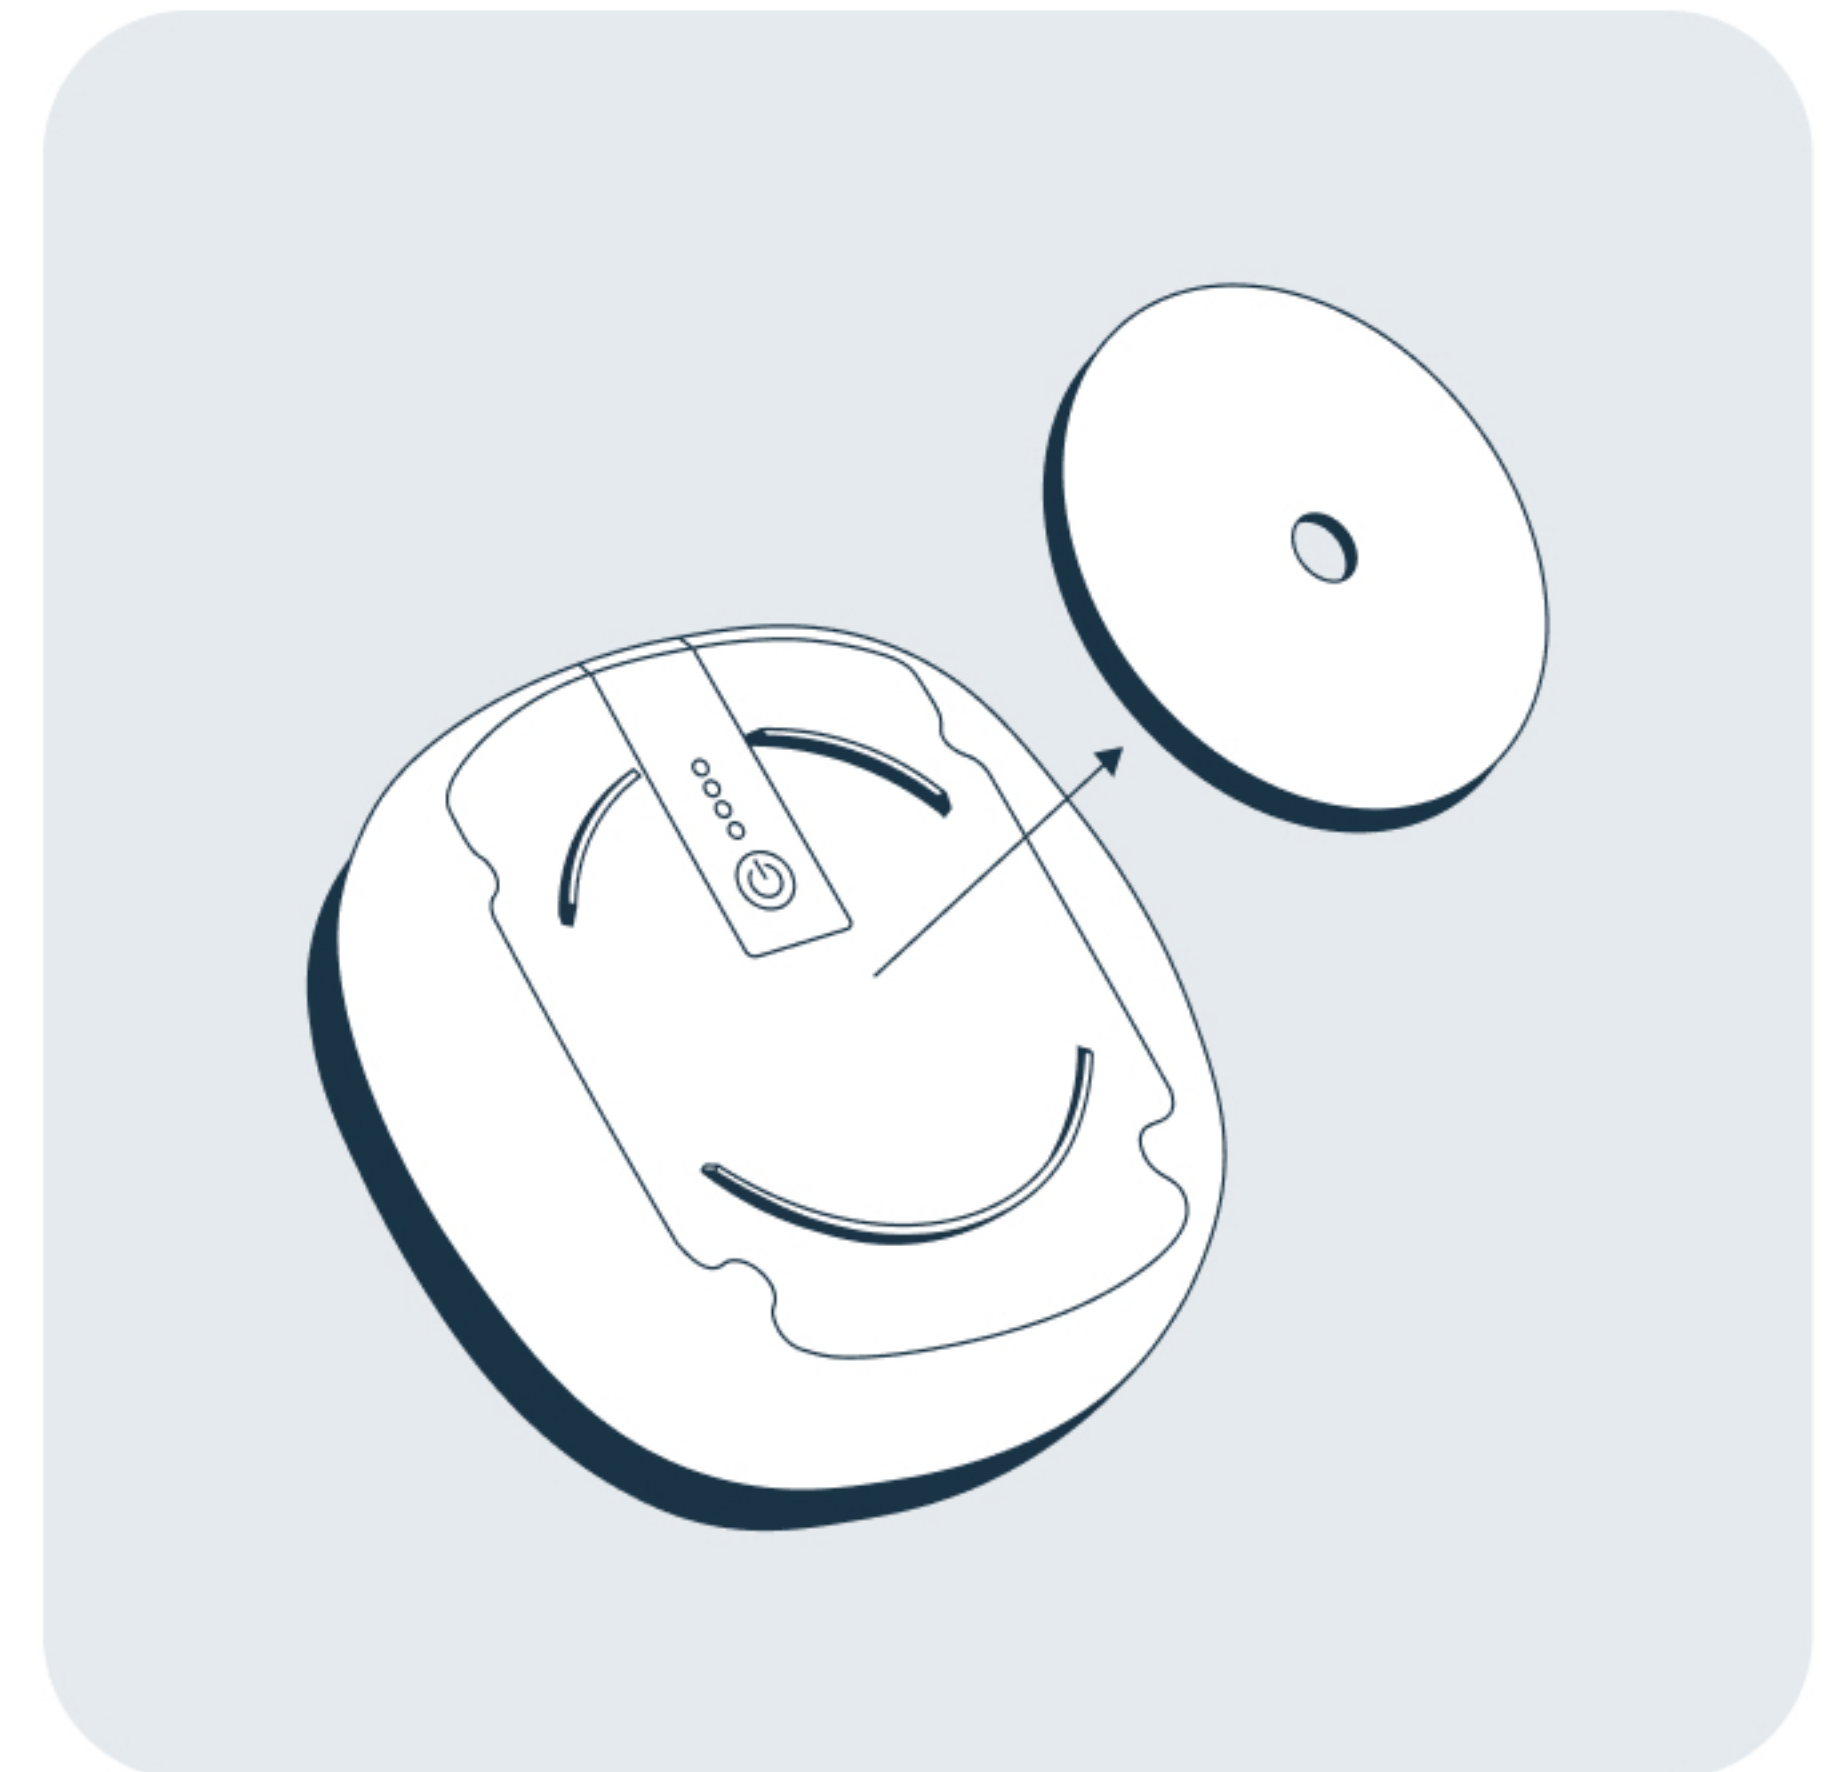

The installation should only take 15 minutes or less

1. Charge your sensor

- Remove the magnetic mounting plate from the back of the sensor.
- Remove the cover from the charging port. Use the attached USB-C cable to charge Minut. Once charged, make sure to secure the cover back on.

You can follow the charging progress by looking at the battery indicator at the back of the sensor. The lights will blink when charging, and turn solid when charged. A full charge should take about 1-4 hours.

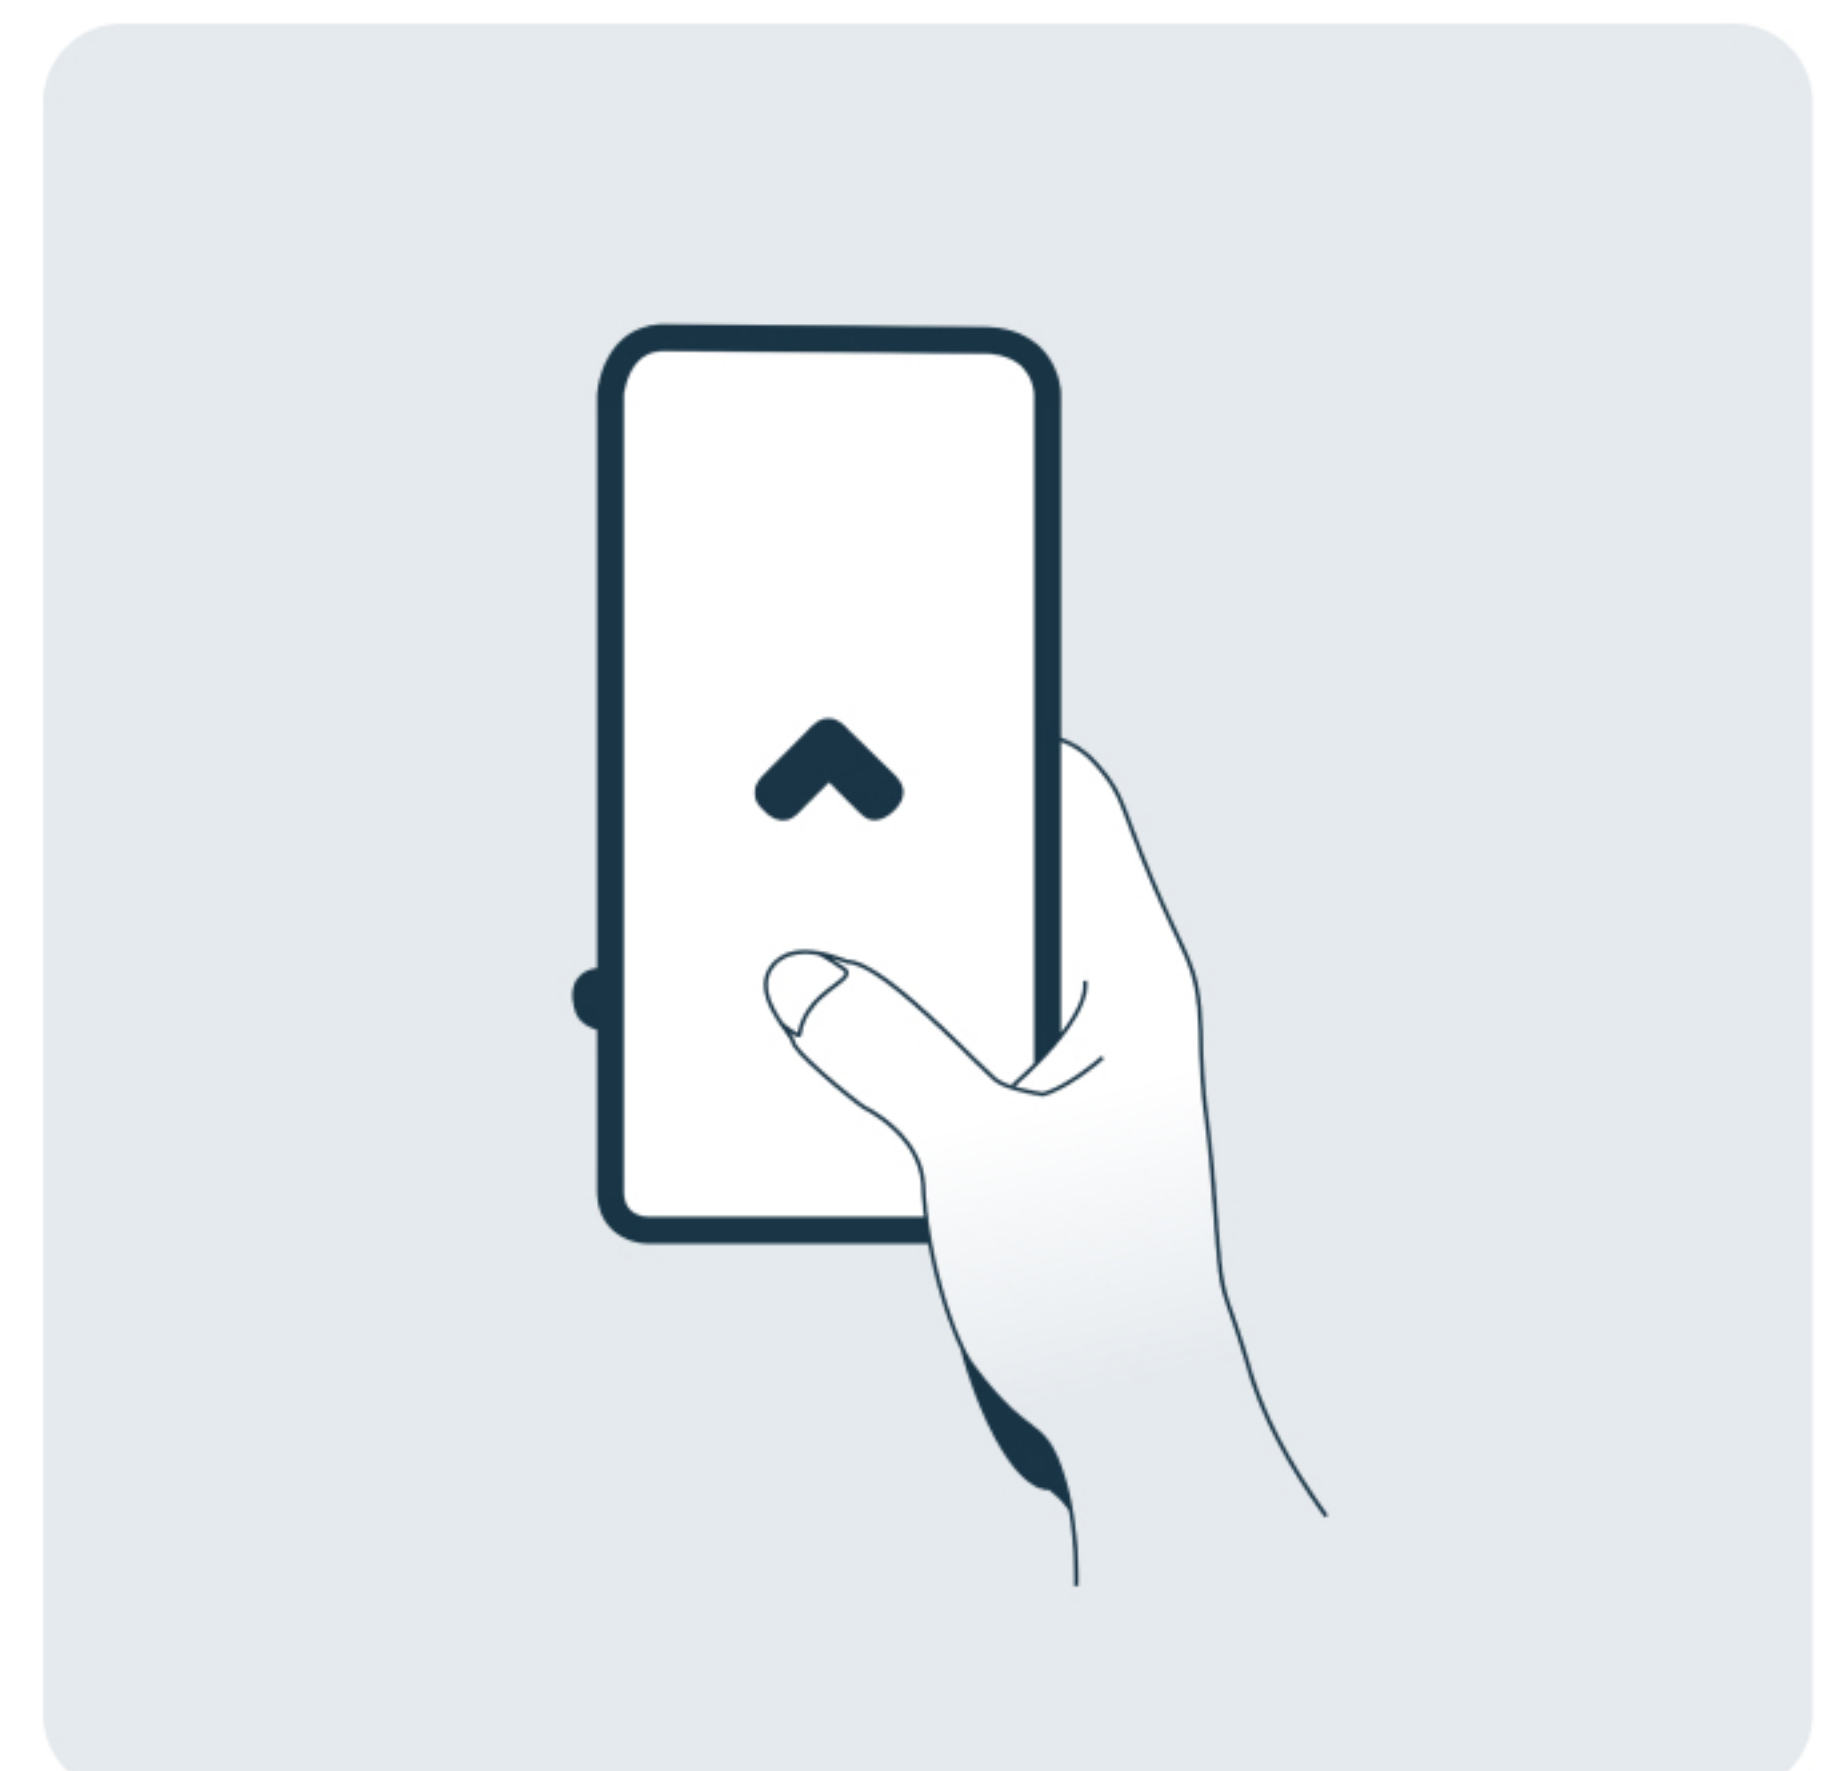

2. Download the app

- Download the Minut app from [Android](#) or [iOS](#) smartphone.
- Open the app and create your account.

If you already have an account, just open the Minut app and log in.

- Create your first home following the steps in the app.
- Once your home is ready, tap on the “+” sign in the top right corner to start the installation process.

Not sure where to install your sensor? [Click here](#) for tips.

3. Install Minut

- Peel off the sticker from the back of the mounting plate, and mount it to the ceiling or the wall.
- Attach Minut to the magnetic mounting plate.

If you want to run your Minut permanently plugged in, connect it to the power outlet at this step.
